- Intel Pentium(R)4 CPU 2.8GHz 2GB RAM 40GB HD computer with COM1 port
- USB to RS232 Converter Cable, Prolific Technology Inc, PL2302

COM1 port setup

USB port setup   (using USB to RS232 Converter Cable)

About these instructions :

- Instructions are written for entry level users. Post feedback/advice to LM Forums as necessary.
- **'Steps'** are things you need to do.
- 'Notes' are things you might like to do or should know about.
- Much of the instructions serve both COM1 and USB setups, but where instructions or results are different, 2 versions are presented showing the difference.
- The instructions are for a computer which is solely using dialup for connectivity, and which is setup for one user.

Step 1.   Install fresh copy of LM13 to your computer.
Plug in the external modem and connect to power and phone line.
